## INVIVA

# Saving with Funds

The INVIVA Fund-Linked Savings and Term Life Insurance – your ideal combination to return-oriented saving and safeguarding.

With INVIVA, you save in the 3b pillar – the free, unrestricted pension plan – and at the same time, you insure yourself against the risk of death. With the savings component, three different funds with different risk profiles are available for selection – you benefit from the profit potential of the financial markets.

### Reliable protection

Guaranteed capital sum upon death for the protection of surviving dependents and creditors

### High level of flexibility

Three investment funds with the possibility to switch during the duration of the contract

### Clear tax advantage

Income tax-free capital payout in case of survival\*

# INVIVA

## Saving with Funds

INVIVA is recommended for those for whom the return on investment from savings is particularly important. The minimum contract period is ten years.

<b>In the event of survival</b>	Payout of the value of the fund shares when the policy expires Payout that is income tax-free*
<b>In case of death</b>	Protection for surviving dependents and creditors Payout in the event of death due to illness or accident of the guaranteed capital sum upon death or the value of the fund shares, if this is higher Privileged position in case of inheritance or bankruptcy for spouses and dependents designated as beneficiaries
<b>Fair conditions</b>	Periodic premiums beginning already at CHF 50 per month (freely selectable) One-off deposit beginning at CHF 5,000 Free choice of beneficiaries Client-friendly surrender – beginning already at 12 months

\* With periodic premiums, the payout is always income tax-free.

With a one-off premium, the payout is income tax-free if the requirements for provision have been met.

INVIVA life insurance offers an optimal combination from savings and risk capital. Investors decide on an investment strategy and choose one of the three funds when taking out the insurance. During the duration of the contract, it is possible to switch within the available range of funds. This way, the strategic orientation may be modified at will.

<b>UBS Vitainvest 25 Swiss</b>	Fund with moderate fluctuations in value for conservative investors	25%	65%	10%
<b>UBS Vitainvest 50 Swiss</b>	Fund with average fluctuations in value for balanced investors	46%	44%	10%
<b>UBS Vitainvest 75 Swiss</b>	Fund with considerable fluctuations in value for dynamic investors	75%	15%	10%
